

BEC WEB PROGRAM INSTRUCTIONS

Menu Bar –

TEST ENVIRONMENT

If you see on the top of any of the web pages you are on the development web site.

BEC Setup - Hyperlink that navigates you to What's Setup Page. This page is used to see What's Setup for a particular Part Number / ECL combination.

BEC Ship Destination - Hyperlink that navigates you to the BEC Ship Destination Page. This page is a tool used by the scheduler to change the schedule for a particular Part Number / Container Type combination.

BEC Data Loader - Hyperlink that navigates you to the BEC Data Loader Page. This page is used to input data into the schedule table.

BEC Part Line Restriction - Hyperlink that navigates you to the BEC Part Line Restriction Page. This page is used to restrict a Part Number from a Machine.

BEC Add Production Run - Hyperlink that navigates you to the BEC Add Production Run Page. This page is used to add a production run to the production run table.

Serial Number Search - Hyperlink that navigates you to the Standard Pack History Page. This page is used to find Serial Numbers for LSR and BEC by date, sub standard id and serial number range.

BEC Part Line Restriction Deleter - Hyperlink that navigates you to the BEC Part Line Restriction Deleter Page. This page is used to delete the restriction for a Part Number from a Machine.

BEC Data Deleter - Hyperlink that navigates you to the BEC Data Deleter Page. This page is used to delete data from the schedule table.

BEC Update Production Run - Hyperlink that navigates you to the BEC Update Production Run Page. This page is used to update production runs in the production run table.

BEC Serial Numbers - Hyperlink that navigates you to the BEC Serial Numbers Page. This page tells you how many serial numbers exist for a certain Part, Destination, Package Code and ECL combination. You can also delete old serial numbers here.

BEC Generic Serial Numbers -Hyperlink that navigates you to the BEC Generic Serial Numbers Page. This page shows all generic serial numbers for a particular Part Number, Package Code and ECL combination. This is used when a Destination is not available. You can also delete old serial numbers here.

Delphi/GM Cross Reference - Hyperlink that navigates you to the Delphi/GM Cross Reference Page. This page allows you to find a Delphi Number if you have a GM Number or find a GM Number if you have a Delphi Number. This page will also give you a full page reference of all GM/Delphi Part Numbers.

BEC Data Loader Page—

KIOSK Database Manager - BEC Data Loader

Part Number:	<input type="text"/>
ECL:	<input type="text"/>
Priority:	<input type="text" value="99"/>
Container:	<input type="text"/>
Package:	<input type="text" value="Y"/>
Mat ID:	<input type="text"/> Optional
# of Schedule Entries:	<input type="text" value="10"/>

This page is used to set up a schedule for a Part Number.

Part Number: : Enter the 8 digit Part Number **ex. 12345678**

ECL: : Enter the 2 digit ECL **ex. 02**

Priority: : Leave number at “99” or change to a different priority like “1” or “2”

Container: : Enter the 2 digit Container Type **ex. FW**

Package: : Select either Y (1 pkg per skid qty), Z (12 pkg per skid qty), C (4 pkg per skid qty) or 4C (1 pkg per skid qty)

Mat ID: Optional : Enter the 5 digit Mat Id if available **ex. 57102**

of Schedule Entries: : This number tells how many times to enter Part Number/ECL/Container Combination to the Schedule. The default number is 10 but it can be changed if necessary.

Load Data : This button inserts data into schedule **# of Schedule Entries** times.

What's Setup : This button navigates you to the **BEC Setup** page and shows everything that is Setup for Part Number and ECL that you input on the **BEC Setup** page.

BEC Data Deleter Page—

KIOSK Database Manager - BEC Data Deleter

Part Number:

ECL:

Container:

Package Code:

Delete Data

Part Number: : Select the Part Number from the Part Numbers that are found in the ICS Schedule Pool

ECL: : Select which ECL for the Part Number that you selected.

Container: : Select which Container for the Part Number that you selected.

Package Code: : Select which Package Code for the Part Number that you selected.

Delete Data : After selecting a Part Number / ECL / Container / Package Code combination, click this button to Delete Data that matches up with your selection.

The records for Part Number 15467175 have been deleted : You will get this message if records delete properly.

That record does not exists, try again... : You will get this message if record does not exist.

BEC Setup Page—

BEC What's Setup

Part Number:

Container: Leave Blank to show all.

What's Setup

PartNo	ECL	CNTR	PKG	PRIORITY	COUNT(PART_NBR)
15467175	02	OT	Y	99	4

Part Number: : Select a Part Number from the Schedule Pool

Container: : You can either enter a (2 digit) Container Code or leave it blank to show all.

What's Setup

: Click this button to show **What's Up** for the selected Part Number.

BEC Ship Destination Page—

BEC Ship Destinations

Part Number: Single

Package Type

☐ Singles
☐ Cardboard Singles
☐ Zytec
☐ Cardboard Zytec

			Priority	Id	Line#	PartNo	ECL	Dest	PKG	PerSkid	Labeled

Part Number:

: To select the schedule for a particular Part Number Select the Part Number from this combo box.

Package Type

- ☐ Singles
☒ Cardboard Singles
☐ Xytec
☐ Cardboard Xytec

: To narrow your schedule to only a certain Package Type for a Part Number Select the radio button found to the left of the Package Code.

: Click this button to view data for selected Part Number.

Single

Single

Multi

: This combo box controls the [Edit](#) , If you select Single , which is the default, you will be able to edit one record at a time. If you select Multi , you will be able to edit every record that has the same Part Number, ECL, Destination and Package Code as the row you are editing. This allows you to put the same Priority for Multiple records.

[Edit](#): To change the priority, click this hyperlink. The records will change to editable mode.

Update Cancel 83 12160437 02 YZ C 1

[Update](#) : Click this hyperlink after a change has been made to the priority.

[Cancel](#) : Click this hyperlink to disregard the change made to the priority before hitting the [Update](#) .

[Check](#) : Click this hyperlink to check to see if serial numbers exist for this Part Number, Destination, ECL and Package Code.

BEC Serial Number Availability

Current Sort Order is PART_NBR ASC

Part Nbr	ECL	Dest	Package Cd	Matid	Std Pack	Labels Available
15438635	01	OT	Z	19557	18	1325

: This screen will come up to give you a count of serial numbers for the Part Number, Destination, ECL and Package Code you selected.

[Back](#) : Click the Back button to return to the BEC Ship Destination Page.

BEC Part Line Restriction Page—

KIOSK Database Manager - BEC Part Line Restriction Loader

Part Number:	<input type="text"/>
Machine Name:	<input type="text" value="800_BL1"/>
Container:	<input type="text" value="AR"/>

Load Data

Part Number: : Input an 8 digit Part Number that you would like to restrict.

Ex. 12345678

Machine Name: : Select the Machine you want to restrict the Part Number from.

Container: : Select the Container Type for the Part Number you would like to restrict

Load Data : Click the button after entering and selecting your data, to input restriction to the Part Line Restriction Table.

BEC Part Line Restriction Deleter Page—

BEC Part Line Restriction Deleter

Machine	Part Nbr	Container	TimeStamp	
800_BL4	12345678	AR	6/6/2005 9:35:43 AM	Delete
P23_BL6	87654321	AR	5/26/2005 1:59:57 PM	Delete

Click the [Delete](#) to Delete a Part Line Restriction.

BEC Add Production Run Page—

KIOSK Database Manager - Entry Form

Dept: : Select Department Number

Part Number: : Enter (8 digit) Part Number

ECL: : Enter (2 digit) ECL **Ex. 02**

Standard Pack: : Enter Standard Pack. **Ex. 96**

Package Code: : Enter Package Code. **Ex. Y**

Container: ☐ CDICS ☐ GICS : Select a Container Type

Box Count: : Enter a numeric Box Count. **Ex. 1**

Broadcast Code: : Enter Broadcast Code (Note: **GM800**—Last 3 digits of Customer Part Number (Ex. GM) and 2 digit ECL. **GM900**-Customer Part Number) **Ex. 61507**

Layer Count: : Enter Layer Count. **Ex. 6**

Create Production Run : Click this button after inserting all of the information above to create a Production Run.

Edit Production Run : Click this button to navigate to the **Update Production Run Page**.

***** : This will show up next to any fields that doesn't have any or the correct information needed to create a Production Run when the **Create Production Run** is clicked.

Serial Number Search Page –
